

YOGESH MALI

Security Analyst | SOC Analyst

India | +91-7499293588 | yogeshmali202506@gmail.com | linkedin.com/in/yogesh-mali4 | github.com/yogesh-045

Professional Summary

Cybersecurity graduate with hands-on internship experience in SIEM monitoring, log analysis, vulnerability assessment, and network traffic investigation. Skilled in identifying indicators of compromise, correlating security events, and documenting findings for incident response. Seeking a Security Analyst / SOC Analyst role to apply threat detection and investigation skills in a production security operations environment.

Technical Skills

SIEM & Security Operations: Splunk, SIEM Monitoring, Log Analysis, SOC, Incident Response, Threat Hunting, IOC Analysis, MITRE ATT&CK

Security Tools: Wireshark, Nmap, Burp Suite, Metasploit, Kali Linux

Networking: TCP/IP, OSI Model, DNS, DHCP, HTTP/HTTPS, Firewall, IDS/IPS

Operating Systems: Windows, Linux

Programming & Scripting: Python

Cloud & Frameworks: AWS (Basic), Microsoft Sentinel (Learning), NIST CSF (Basic), ISO 27001 (Basic)

Experience

Cybersecurity Intern (Remote) — Prodigy InfoTech

Nov 2025 – Dec 2025

India

- Monitored and triaged security events using SIEM concepts and log correlation techniques to identify indicators of compromise (IOCs).
- Performed vulnerability assessments, network scanning, service enumeration, and OS fingerprinting using Nmap to identify security gaps.
- Analyzed Windows and Linux network traffic with Wireshark and Scapy to detect suspicious activity and potential threats.
- Developed Python automation scripts to streamline log analysis and threat detection workflows.
- Prepared security reports documenting findings and remediation recommendations for incident investigations.
- Applied cybersecurity best practices aligned with industry standards during assessments and investigations.

Projects

Splunk SIEM Security Monitoring & Incident Detection | Splunk

- Collected and analyzed Windows Security Event Logs using Splunk SPL to investigate suspicious account activity.
- Investigated authentication events (4624, 4625, 4688) and performed log correlation to reconstruct incident timelines.
- Built security dashboards and visualizations for real-time monitoring and threat detection.

Network Traffic Analysis | Wireshark, GNS3

- Captured and analyzed TCP, DNS, HTTP, ARP, and SSL/TLS traffic using Wireshark to identify abnormal patterns.
- Simulated an enterprise LAN in GNS3 to monitor network communication and test security controls.
- Validated Windows Defender Firewall rules and applied network security best practices.

Education

Bachelor of Science, Computer Science

SSVPS College of Science, Dhule — North Maharashtra University, Jalgaon | June 2022 – July 2025 | CGPA: 8.35/10
